- ➔ PoE Injectors

Comnet's products are designed, built, and tested in the USA with limited lifetime warranties and global support. We're proud to be the company customers and partners rely on because we build more than networks. We build the trusted connections that power industries forward.

## Solutions

Our solutions are designed to exceed the challenges from demanding environments.

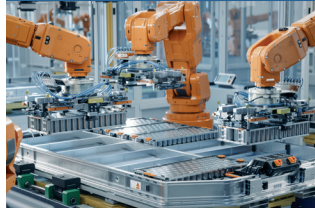

### Power

### Transportation

### Manufacturing

### Security

## Secure by Design

At Comnet, we prioritize cybersecurity at every level—so you don't have to choose between connectivity and protection. We are a trusted part of your entire networks defense strategy. By ensuring our devices are fully secure, you know that Comnet will not expose any weak point into your network.

Our products are secure by design and kept up to date with the latest standards to help prevent your communications infrastructure from becoming a target.

## Leverage Our Industry Expertise

Comnet is here to support you throughout your project lifecycle. We offer support in:

Requirement Definition

Testing and Training

Network Planning and Design

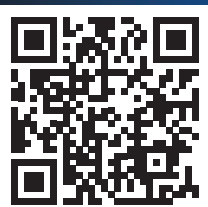

System Upgrades

Device Configuration

Post Setup Support
